Summary

Aspiring AI and Software Engineer with practical experience in Generative AI, Machine Learning, and database systems. Passionate about building real-world intelligent applications.

Education

B.Tech in Computer Science Engineering 2023–2027
Raghu Engineering College, Visakhapatnam

Intermediate (MPC) 2020–2023
Narayana Junior College, Guntur

SSC 2020–2021
Siddardha High School

Skills

Programming Languages: Python, Java, C, SQL

Database: DBMS, PostgreSQL

AI/ML: Machine Learning, Generative AI, LLMs

Tools: GitHub, VS Code, Jira

Projects

Fake Job Detector using Generative AI & Machine Learning 2026–Present

- Developed an AI-powered system to detect fraudulent job postings using Machine Learning, Generative AI and LLMs.
- Built FastAPI backend services for job risk analysis, company verification, and salary validation.

Personal Portfolio Website 2026

- Developed a responsive portfolio website showcasing projects, skills, certifications, and internship experience.
- Built using modern web technologies with an interactive and user-friendly interface.

Experience

AI & ML Intern 2026–Present
Navatrix Organization

- Worked on real-world IT projects involving AI, backend development, databases, and REST APIs.
- Collaborated using Git, Jira, and Agile methodologies.

Generative AI Intern 2026–Present
AICTE – Eduskills

- Worked with Large Language Models (LLMs) and prompt engineering.
- Developed AI solutions for automation and content generation.

Python Full Stack Developer Intern Jun 2023
AICTE – Eduskills

- Developed and tested web application components.

Achievements

- Won 1st Place in Code Carnival Coding Contest (GeeksforGeeks).
- Participated in Adobe India Hackathon.
- Successfully completed a Data Science Internship at Thiranex.
